

Ruttle Plant is totally committed to the ongoing improvement of health and safety performance throughout its organisation and is always looking to exceed the recommended best practice. This is done by continuously assessing our own and our client's requirements.

Ruttle Plant accept nothing less than Zero Harm throughout all areas of our business. All our operators have been fully trained and have been issued with the Construction Plant Competence Scheme card – operated and regulated by CITB - which is the main accepted proof of an operator's competence on a UK construction site, taken further by our own in house training to comply with HSE guidelines.

In addition to in-house training and CPCS cards our 360 operators have CPCS Lifting Operations category.

Health Surveillance

Ruttle Plant are now members of the Constructing Better Health (CBH) Scheme whereby our employees undergo a full health screening to meet CBH standards. This comes in the form of screening and regular medical and wellbeing questionnaires. This information is compiled and stored on a database and the operator holds a CBH medical card which holds the necessary information indicating they are fit for work. Operators will be able to present this card on site upon request.
