

CS 100

Powerful, effective & value for money

GreenMech
The Professionals' Choice

Customer category

Residential • Landscaper • Estate Maintenance

If 'on-the-spot' chipping in confined spaces is what you are looking for then the GreenMech CS100 is the absolute solution. Designed for the professional landscaper, tree surgeon, jobbing contractor and/or domestic user who needs to access narrow passages alongside properties, in gardens or hard-to-get-to sites, the CS100 wood chipper is a mere 760mm wide. The beauty of this high output machine is that the operator can take it to the clearance site rather than bring all the material to the machine. The direct benefit is a greatly reduced job completion time, less labour and more profit potential.

Available in a 16hp recoil-start or 18hp electric start petrol-engine specification, the GreenMech CS100 is capable of a multitude of tasks related to the safe and environmentally conscious processing of wood waste and vegetation. It is manufactured in a heavy-duty, long-life specification that will suit contractors, landscapers and large estate/parkland applications.

A tractor PTO driven CS100TMP is also available.
